

Paint Consistency Indicator

How to measure paint consistency: Print this Paint Consistency Indicator and slide it inside an [Acrylic Sign Holder](#). Fill the circles with the paint mixes that you want to test. Set a timer to 10 seconds, lift the sheet of paper vertically, and start the timer. Set the indicator back down once the 10 seconds are up and see to which numbered line the paint drop traveled to. Compare your reading to the numbers on the right. Wipe clean the acrylic sign holder to reuse.

0-1: Blob **5-7: Open Cup**
1-2: Bloom **6-7: Pearl**
3-3.5: Funnel, ring, **7-9: Dutch Pour**
flip cup, colander **7-9: Cell Activator**
3.5-5: Other Pours like swipe, puddle
pour, flower dip, kiss, string pull,
balloon smash, and split cup
